# WEYLER IS READY TO LEAVE

He Knows a Liberal Cabinet Will Mean His Recall.

DENUNCIATION OF CAMPOS

It Is the Impression in Havana That Senor Dopuy de Lome Will Not Be Disturbed-The Cuban Forces Have Two Successful Skirmishes With the Spaniards.

Havana, via Key West, June 5 .- Gen. Weyler has arrived in Havana. It is said that he is prepared to embark for Spain, leaving the Marquis of Ahumada in mand of the Island as soon as the news comes that a Liberal cabinet is in power in Spain

The press censor has not yet permitted the details of the cabinet crisis in Spain to be published here. Many reports are in circulation, some affirming that Martinez Campos has been called by the Queen to form a cabinet, others that Gen. Polancia is the coming man, while most reports say that Sagasta will be the premier. The bitterest comments are passed in the captain-general's palace on Gen. Martinez Campos, who is supposed to have personal feelings of animosity against Gen. Weyler.

Well-informed persons here say that Senor Dupuy de Lome will remain in Washington. He became minister owing to the teller prevalent at Madrid, during Mr. Cleveland's encumbency, that he was s personal friend of Mr. Olney and would have much influence with Mr. Cleveland. It is hoped in Madrid that the Spanis! minister will be equally influential with the present Administration.

The Cuban leader, Roban, received a letter from Gen. Montaner, near Sagua, threatening to exile his family, living in that town, if he did not surrender Roban answered that he would never sur render to Spain and challenged Montane

The Spanish general started out of Sagua with his column to meet Roban, and the engagement took place a few miles from the town Montaner had to retire, leaving forty-two dead on the field and carrying over 100 wounded with him. Col. Tejeiro. of the Spaniards, narrowly escaped being

In Havana province, the Cubans, under Gen. Alejandro Rodriguet, had an engagement with the battalion of Guadalajara, near Caraballo, compelling it to retire.

#### PRIVATION AMONG FISHERMEN. Bad Weather Has Made the Markere Season a Fallure.

Balifax, N. S., June 5 .- Great privation exists among the shore fishermen of this The mackerel season has so been a failure, and during the past two weeks there have been on the local grounds no less than 150 vessels of all classes, and not 100 barrels were taken. Long-continued had weather is the cause If the second run of mackerel falls it will mean starvation for hundreds on this coast. Mingled with this dread of impending poverty is indignation. The people say

cester schooners deliberately sail through their nets, quite indifferent to the damage done, which has been considerable. A complaint is to be made to the Dominion government.

### MURDEROUS NEGRO HUNG

He Tried to Kill the Family of H. J. Hewson.

He Confessed His Crime, and Said He Was Sorry He Had Not Been Successful.

St. Augustine, Fla , June 5 - News was received here this evening of the lynching at or near Orangedaic, St. John's county, on the St. Johns River, of a negro named Isaac Barrett, for attempting to murder the entire family of H. J. Hewson, on Thursday, at midnight.

Barrett entered their house at midnight and struck Mr. Hewson a fearful blow on the head with a heavy club, knocking him senseless. Mrs. Hewson was awakened. As she turned over Barrett struck her a blow, smashing her forchead in. Their little son, aged eleven, came run ning, in, awakened by the noise, and the negro attacked him, flooring him with blow that cracked his skull.

Yesterday at noon the neighbors came and after some sharp work Barrett was ar rested, as all the clews lead to his cabin ing along toward the magistrate's office Barrett jumped from the wagon and seize

Barrett cried out defiantly at first, but seeing the stern faces of the men, he wilted and cried for mercy. He was nelped out and the band marched out to the woods with him. The negro shouted with all his might, praying and cursing by turns. The men compelled Capt, Patterson to return the way he came and to

ask no questions. Late this afternoon it was learned that Barrett's body adorned a live oak tree

# BOGUS CABLE NEWS. of the Methods of the Associated Press Exposed. New York, June 5.-The Tribone today, in common with other New York papers, which are members of the Associated Press, printed an alleged cable dispatch, from Constantinopie, purporting to contain the text of the message sent by the Czar

Nicholas to the Sultan, on May 17, after the fall of Domokos, asking for the cessa tion of hostilities.

The New York Sun, on May 20, printer a cable disputch from London, giving the full text of this message and the Sultan' reply thereto. A comparison of the message of the Czar printed by the Sun, more than two weeks ago, with that printed in the Associated Press papers today, shows that the "text" of the message sent out by the latter organization is garbled and inaccurate in several im portant particulars.

The Sun will print tomorrow both dispatches in full under the caption: "Press News Performances. How Good People Get Perverted;" adding this comment "This is very interesting. It shows that the members of the great criminal news trust are not averse to the pettiest of awindles on their readers and themselves. ## TESLA'S GREAT DISCOVERY

He Claims That He Can Send Tele graph Messages Without Wires.

A Wonderful Machine That He Has Invented Can Carry Messages Through the Earth.

New York, June 5 .- At last Nicolas Tesla has reached a point in his investigation of the possibility of tele graphing without wires to make a positive incement of his achievements.

Mr. Tesla declares that he has pr duced electrical device swith which he can actually send and receive messages by a system which can be so applied as to make it possible for an operator in New York to communicate with case and certainty with the people of any part of the earth, and, perhaps, even with those of the stars, if any of these are inhabited

"The machines which I have completed," Mr. Tesla said today, "will carry message through the earth for a distance of twenty miles or so. I have sent and received signals with them and I feel confident that I am not mistaken in saying that the problem upon which I have spent many days and nights, is solved.

"Of course, it is possible that I as mistaken. I shall at once make machine which I expect will enable me to tel graph to any part of the earth as readily as I can within a limited distance by means of the ones I have."

Mr. Tesla was not ready to explain i detail the devices which he uses for telegraphing without wires, but made it clear that results were obtained by the use of some form of his electrical oscillator, recently patented. As long ago as he said, when he was putting up telephone wires in Budapest, he observed that electrical impulses were carried long distances without the intervention of wires. This set him to investigating she electrical condition of the air. He became satisfied that the messages Were con veyed to the telephone wires by induc

"I have perfected my machines and got excellent results," Mr. Tesla said. "I have thought of this system of telegraphy not as a mere commercial matter, but as a closer together. I conceive that the us of this system will not do away with use of telegraph wires, but will, on the other hand, make more work for the The manner in which I conceive that the system should be used is this:

"Have a machine at each commercial or political center, and send out from each place, under an international agreemet, all itical, financial or other news, to be read at every other part of the world at the same moment. The news could be otherwise. Financial panics and even war might be done away withif this were de Mr. Tesla says the transmission of signals is not the only result which may achieved by his new scheme.

"THE LORD'S ANNOINTED"

THE LATEST OHIO IDEA.

Kaiser William Believes He Rules by Divine Right.

HIS SUBJECTS DISSATISFIED

Murder a Lighter Crime in His Eyes Than That of Lese-Majeste. Thousands of His Subjects Hejeg Driven Into the Ranks of the Socialists.

London, June 5 .- The acquittal yesterday in Berlin of Major von Tausch, formerly chief of the political police, who was charged with high treason, forgery Mr Grundy's best. Winfred Emery, Wil-and perjury, has had the result of intensifying the feeling against the feudal system, which finds its most active sup-

vine right of kings" than Emperor William kinself, and the slightest word uttered against him, if it comes to the ears of his public prosecutor, is sure to result in a trial for lese-majeste and a long term

of imprisonment. Cold-blooded murders by military officers of defenseless citizens sometimes lead to the murderer serving a short term of imprisonment, but to speak against the "Lord's annointed" is, in German law, a far more serious crime thankmurder. To publicly question the omniscence of the Emperor is, generally, to land in fall with no hope of pardon, and the people are beartily tired of this condition of af-fairs. The oppressive action of the law relating to the less majests, has driven thou sands of the middle class into the ranks of the socialists, and the danger of a serious revolt against the present system

is rapidly growing greater.

The attempt of the Emperor and the highest class of the nobility to foist the feudal system on the people is not the only danger that threatens Germany. The eccentricity of the Emperor is well known and high military officers are always fearing that he will some day take it upon himself to plunge the country into war, when he would, of course, assume supreme command, with the probable result of bringing disaster upon himself and

THE CZAR WILL VISIT LEO.

But by No Means Must Go There Direct From Humbert's Palace. London, June 5-10 has been decided that the Czar, upon the occasion of his approaching visit to Rome, shall, when he visits the pope, follow the plan adopted in the case of the visit of the King of Siam to his boliness, Under the peculiar onditions existing between the quirinal and the vatican, the Czar could not drive from the place of King Humbert to the residence of the pope. He will therefore, go from the quirinal to the Grand Hotel, where he will remain for a short time, and then proceed to the vatican. All of which seems to an outsider, to be bearing the devil around a stump, but the diplo mats in Rome seem to be relieved now that the weighty matter is finally dis posed of. NEGOTIATING WITH MENELIK. England and France Striving With

One Another for His Favor. London, June 5.-Considerable interes attaches to the outcome of the British mission to the Negus Meneille, of Abyssinia. The object of the mission was two-fold It was intended to counteract the in-fluence of a Freenh mission to Menelik and to induce him to myrender certain territory which he wrested from the Mahdi, and which England clatins in be-half of Egypt. It is pretty certain that Menelik who, since his defeat of the Italians, has an exalted opinion of i military prowess, will not surrender to territory in question unless he is compelled by force to do so, and England has a large enough contract on her hands at present in dealing with the Mandi, without fol-

owing a line of action that would drive Mencick to side with the Dervishes.

STEWART.

The object of the French mission, which has not yet reached the Abyssinian capital. is to get Menelik to assist France in establishing herself in a region which England has often declared should be occupied by no country but Egypt. Should the French, therefore, succeed in forming an alliance with Menelik, England might be compelled to a policy fraught with the most serious consequences.

Des Moines Young Men Contaminate Its Moral Atmosphere.

30 -They Follow the Example of the Rakes of Gotham-Ministers Up in Arms.

Des Moines, Town, June 5. - Prospects for a lively Sunday are unusually bright bere. No less than seven ministers of various denominations have announced their intention of preaching sermons to morrow on the subject of "immorality in our city," and it is said that every one of their congregations will include members -unless many prominent charch-goers stay out of their pews-who will feel that they are the ones at whom the preaching is directed. All this comes from Des Moines

attempting to imitate the naughty ways About sixty young men, some of them not so young either, and all of them socially prominent here, decided that an imita tion of the Seciey dinner of metropoli tan fame, would be an enlivening sport As they knew of no restaurant suitable for such a performance, they hired a barge and attempted to tow it up the river las night. They also hired three young pe sons: gender, feminine; genus, real lady; species, sonbrette, and took them along. The barge was well stocked with char pagne: so were the soubrettes. By spec request they had brought costumes with them; and by particularly special request those costumes were such that it old have been just about the same

if they had been left at home. When the barge had gone two miles up the river the performers disrobed, put of and gave so weird a series of dances that joy reigned supreme on board, and pretty much everybody got drank. Probably nothing would have come out but for the fact that the famous Cherry Sisters were giving a garden show at Croker Park, on the bank of the river. The revellers had their barge towed in near shore and proceeded to bombard the show with bottles, chiefly

there and responded with stones and articles originally designed for contribution to the Cherry Sisters, but quickly ceases hostilities upon the appearance of a vision of peace, who appeared upon a platform on the barge chal in the effulgence of the moonbeams and nothing else visible from The vision pointed her toe at the de

clining moon, and it is alleged that there was a lunar earthquake. Then she did a dance, characterized largely by a cheerful The Cherry Sisters had to close shop, and overal of their audience tried to swim out to the barge, but were rudely repulsed. Next day there were rumors enough around town to start a European The clergy announced their lutention of preaching on the subject.

One woman and two men, peasants, are reported as having been severely burned by the fiery lava. The fact that the eruptions of Vesuvins occur within a few miles of Naples, in the thickly populated section of Italy, has given the mountain a prominence in his tory which it would not otherwise have
